Description

High-quality, high-performance footwear for hunting in the mountains and for work in the environment. The upper is made of Perwanger 3mm PU Tech leather and Ballistic fabric along the shaft, to ensure a perfect combination of resistance, protection and comfort in the ankle joint.

Details:

- Performance fit - dry and enveloping shapes, for professional footwear in the Mountain segment, designed to promote precision and sensitivity when used in rock and ice climbing. Such as in the Hayatsuki GTX and Tengu GTX models that adopt the Performance Fit shape. Here the heel has an anatomical shape designed to hold the foot and with the forefoot part which, without compromising the precision in the toe, is more spacious and thus guarantees better warmth and blood circulation even during prolonged stops with the feet in the snow.
- AIR 8000 is the first technology for the construction of the upper developed and patented by AKU since 1991 to increase the breathability of a mountain shoe. Laboratory tests carried out by Gore Tex confirm that the upper made with the exclusive AKU AIR 8000® system offers a level of breathability up to 11.5 times higher than normal standards. Almost 20 years later, the AKU AIR 8000® system remains one of the most advanced technologies to ensure excellent
