Description

Professional headlamps are not only popular in everyday life with joggers and cyclists, but also in industry, crafts, rescue services, camping, mountaineers and anglers.

Due to the built-in sensor, both hands remain free and the light is always exactly in the right place! Due to the in-house developed housing made of ABS plastic, the lamp ensures the required robustness and a pleasant feel. Super light, easy to carry headlamp

At 91g (including batteries), the ANSMANN HD230BS is a real flyweight, making it very comfortable to carry even during extended use.

Universal headband

The elastic headband is flexible and universally adjustable, ensuring a secure fit on any head.

Optimal operating light due to highly efficient reflector system

For maximum light output, the LED is enclosed by an optical reflector system, which optimally focuses the light and thus achieves a high luminous range. This results in a very good and homogeneous illumination. In addition, the lamp includes a COB LED which allows pleasant work in the dark at close range.

Adjustable lamp head

The ultra-bright 5W LED as well as the red COB LED and the up to 45° adjustable angle of the lamp head guarantee optimal illumination in all situations.

Different light modes - easy operation through sensor technology

The headlamp has two easy-to-use push buttons that are easy to operate even

while wearing. Likewise, the lamp is easy to use with gloves. The lamp offers the following switch functions:

Button 1: Brightness levels (30% / 100% mode), red COB LED.

Button 2: Sensor technology: With this switch you can activate or deactivate the sensor. The lamp can then be turned on and off in the previously selected mode by gesture control.

Holding the button for 5 seconds: red COB LED flashes.

Package weight 0.133 kg
