Extremely bright 930 lumen 10W LED torch with high-efficiency reflector system, incl. 4x ANSMANN alkaline batteries and wrist strap

Description

The professional M900P 10W LED torch from ANSMANN impresses with its ideal proportions and non-slip exterior. The lamp housing is made from robust ABS plastic. This has the advantage that the material does not cool down so severely in extremely cold conditions. The carry-comfort and the ergonomics in particular are optimised by this. Holding the torch for a long time in cold weather is no problem.

Ultra-bright, shockproof and waterproof

Equipped with the latest LED technology from CREE, a high-efficiency reflector system and three light functions controlled by a microcontroller, the torch is optimised for ideal light output and lighting range. This enables objects to be identified at great distances in the dark by using Boost mode to achieve a range of up to 240 metres. The lamp is waterproof up to 1 metre and impact resistant up to 1m drop height, tested per IPX7. This maximises the service life of the torch and also protects it if it falls into a puddle or if it is used in heavy rain for example.

The M900P LED torch achieves a brightness up to a super-bright 930 lumen. Thanks to the different lighting modes, the lamp can achieve a battery life of up to 20 hours in continuous use. The high-efficiency reflector system enables ranges of up to 240 metres to be achieved. Despite the high power, the LED is always controlled in a gentle and sustainable manner. This enables the LED to achieve a service life of several tens of thousands of hours.

Color	black
Illuminant	CREE LED
Illuminant power	10 W
Power supply	4× Mignon AA / LR6
Light flux	930 lumens
Lighting range	240 m
Operating time	20 hours
IP protection	IP67

Brand country - Germany.
