Description

Armytek CR123A Lithium Battery – 1600 mAh, 3.0V

The **Armytek CR123A Lithium Battery** is a reliable and powerful energy source designed for high-performance devices. With a capacity of **1600 mAh** and stable **3.0V output**, it is ideal for tactical flashlights, optics, cameras, and other high-drain electronics.

Reliable Power for Demanding Devices

CR123A lithium batteries are widely used in professional equipment where consistent performance matters. They provide stable energy output even in demanding conditions, making them a trusted choice for outdoor, tactical, and emergency use.

- Stable performance in high-drain devices
- Suitable for tactical and professional equipment

ORDER CONFIRMATION

- Reliable operation in varying temperatures

Perfect Backup Power Solution

These batteries are an excellent backup option when rechargeable batteries such as **18650** are not available. Thanks to their long shelf life, they are ideal for emergency kits and long-term storage.

- Up to 10 years shelf life
- Low self-discharge rate
- Ready to use when needed

Wide Compatibility

- LED flashlights
- Optics and night vision devices
- Cameras and photo equipment
- Electronic accessories and sensors

Specifications

Type	CR123A Lithium
Voltage	3.0V
Capacity	1600 mAh
Shelf Life	Up to 10 years
Protection	PCT protection
Origin	Made in China

Why Choose Armytek CR123A Batteries?

- Trusted performance for high-output flashlights
- Long-term storage without significant power loss
- Safe operation with built-in protection
- Reliable backup power for critical situations

Safety Information

Use only in compatible devices. Do not recharge, short-circuit, disassemble, or expose to fire. Insert with correct polarity. Keep away from children.

Glossary

- **CR123A**: standard lithium battery format used in high-performance electronics
- **mAh**: milliampere-hour, indicating battery capacity
- **PCT protection**: safety mechanism protecting against overcurrent and short circuits
