COMPACT MULTI FLASHLIGHT WITH
ADDITIONAL RED LIGHTCRYSTAL

1-4 Weeks

Description

Crystal is a multifunctional model with bright red light up to 30 lumens and white light up to 150 lumens that easily fits in a pocket. Thanks to its fully luminous body and 140° wide spill, the flashlight is indispensable for close range everyday use: for jogging, cycling or garage works. Red light of the Crystal model is suitable for performing works in the dark and for maintaining night vision when turning the flashlight on and off: in a camping tent, when observing the stars, for fishing or cycling. It also has an additional advantage for outdoor activities – allows to illuminate the area without attracting annoying insects. The flashlight works for up to 50 days in the minimum brightness mode. There is no need to additionally purchase and constantly change the batteries: the built-in Li-Pol battery is charged using any Micro USB cable. The multi flashlight does not take up much space in a backpack or bag, freeing it up for other things. The model is securely fixed on the head with an elastic band, allowing for good lighting during any activity. The flashlight can be attached to any item of clothing, belt or backpack strap for safe hiking at night. With the help of special silicone rings in the set, Crystal is securely installed on a bicycle. In addition to that, body design with a hole for a keyring allows using the multi flashlight as a stylish accessory.

CRYSTAL – MULTI FLASHLIGHT 5 IN 1

HEADLAMP

- Soft elastic headband
- Specially designed body with thought-out optical elements provides
