Multi flashlight with white and green light – even more features for everyday and professional use.

1-4 Weeks

Description

Four LEDs, two light colors, one flashlight. Wizard C2 WG is a multifunctional main or additional light source for any kind of activity.

Thanks to the additional green output, the model is optimal for maintaining night vision when interchanging between turning the light on and off: in a camping tent, for reading maps when navigating the terrain, during the preparation of fishing gear or when organizing an ambush on a hunt, as well as in professional use.

Just like the red one, green output is efficient during fog and in other conditions of limited visibility, and is comfortable for long-term application. However, green light has an important advantage: it provides greater clarity of lines and more detailed display of objects, allows distinguishing colors. It is almost invisible from the side, and is also not perceived as a threat by animals and birds, which is especially useful when observing wildlife or hunting. The use of Wizard C2 WG in green light modes does not attract annoying insects.

The flashlight has several installation options. Powerful magnet in the tailcap allows attaching the flashlight to any metal surface. Comfortable headmount and steel clip to fix to clothes or backpack are included in the set. Wizard C2 WG is also compatible with optional bicycle mount ABM-01, as well as with AHM-02 helmet mount.
