Wizard C2 WR is a universal model with powerful red and white LEDs.

1-4 Weeks

Description

Perfect as a primary or additional light source for any situation. The flashlight is suitable for performing tasks in the dark or maintaining night vision when alternating between turning the light on and off: in a camping tent, when reading maps or observing the stars, for fishing, hunting, cycling or professional application.

Additional red light with 230 lumens is more effective during fog or other conditions of limited visibility. It can be applied as a rear bike light or a warning beacon. Fishers and hunters will surely appreciate the model: red light won't scare off animals or fish. Wizard C2 WR also has an additional advantage for outdoor activities – it allows to use the flashlight without attracting annoying insects.
