Description

The permanent impregnation penetrates the fabric and thereby impregnates the clothing permanently. After just one treatment, the water rolls off the material. It is suitable for all washable fabrics, protects down and all insulating materials. Only one application is required, then the impregnation lasts up to 24 washes.

Guaranteed to remain effective even after 25 washings in Sport-Wash or Sensi-Clean. This is an extraordinary claim no other product is willing to make -- not even factory-applied Durable Water Repellents.

One bottle impregnates two to four items of clothing. The fabric remains soft and breathable, is not additionally stressed when wet and dries odorless.

It does more than wax, long-chain polymers and silicone. It does not contain ultraviolet brighteners, which prevents the material from yellowing.

Impregnation is recommended for all breathable systems and functional

membranes.

- permanent impregnation protection
- contains no UV brighteners

Engineered for synthetic materials and blends like polyester, Microfibers, Nylon, Gore-Tex, Waterproof Breathables, Laminated or Coated, Fleece, Polypropylene, Blends, and Imitation Leather.

If used on absorbent materials a second treatment may be required for natural absorbent materials like Cotton, Wool, Down, Canvas, Suede and blends that contain Cotton.

Permanent Water-Guard is a solvent free, water-based fluorocarbon polymer water and stain repellent. It dries odor free and without U-V brighteners. It is not flammable.

Brand country - U.S.
