Description

The Ballistol optics cleaner is ideal for cleaning optical surfaces without leaving any residue and for preparing an anti-fog coating. Residue-free cleaning of high-quality optical equipment (telescopic sights, binoculars etc.). Suitable for synthetic lenses and plastic glasses. Effectively removes dust, dirt and fingerprints from binoculars, rifle scopes, glasses, visors and much more. Due to the alcohol it contains, the lens cleaner evaporates completely without leaving water marks. The Ballistol optics cleaner in the 30 ml spray bottle was developed in collaboration with Leica Sport Optics and is particularly suitable for high-quality optical devices. Application for a precise view:

1. Rinse off any coarse dirt on the lens with water beforehand.
2. Carefully remove light dirt with an optics brush or Ballistol compressed gas cleaner.

3. Then treat stubborn residues such as fingerprints or stains with the new Ballistol optics cleaner: simply spray onto the lens and spread in a circular motion with a special microfiber cloth.
4. For optimal results and an anti-fog effect, polish out the cleaner with a cloth.

Special Characteristics: silicone-free, PTFE-free, acid-free.

Content: 30 ml spray.

Made in Germany.
