## Description

Ballistol SEAL FILMSPRAY was developed for the extreme climatic conditions in the USA and Australia.

No matter whether the conditions are icy, sauna-bath-like, full of ultraviolet radiation and gleaming light or salt fog - **SEAL-Filmspray** provides a protective sealing and insulation. Perfect long-lasting, hardwearing anti-corrosion, even if exposed to aggressive gases, seawater and industrial sewage as well as acid rain. The protective layer can easily be removed when no longer needed. Ideally designed for the protection of bare machines and machine parts, excellent for the preservation of workpieces made of iron, steel, or nonferrous metals as well as die-casting dies that need to be stored.

**SEAL-Filmspray** is perfectly suited for the insulation of electric connections, switches and plugs. Unsurpassed for sealing all sorts of surfaces.

- For sealing surfaces of all kinds

---

- Eliminates surface discolouration
- Treated surfaces retain their appearance.
- Seals and coats with a transparent, protective film.
- Protects during frost, steam sauna climate, blazing UV sunlight, salt fog and salt water.
- Provides long-term corrosion protection against corrosive gases, industrial waste water and acid rain
- PVC film seals, coats and insulates
- Protection of precision and rough textured workpieces
- Insulates electrical connections and contacts

Content: 200 ml pump spray.

Made in Germany.
