Description

Due to its very low viscosity this oil is able of creep and adheres strongly to metals. Ustanol is perfect for maintaining, lubricating and preserving precision equipment, machinery and equipment, tools, various metal parts and components, even brass and other non-ferrous metals. It is resistant to aging and does not resinify. Its surface tension is very low, therefore this oil can displace water successfully and protect from corrosion by creeping into any gaps and fissures easily. Likewise Ustanol has succeeded as a contact oil, guaranteeing an application range between - 50° C and 150° C. No chlorinated solvents, polychlorinated biphenyls or other solvents which could pose a risk to groundwater. Ozone neutral spray. Brand country - Germany
