## Description

The Baseus cable is 100 cm in length and supports a maximum output current of 2.4 A. It offers both comfort and functionality, making it ideal for use in a variety of settings. Crafted from high-quality materials, this cable ensures longevity and reliability. The nylon composition prevents tangling, enhancing usability and maintenance.

This cable facilitates charging and data transfer between USB devices and Apple devices equipped with a Lightning input. Its double-sided USB connector is designed to prevent incorrect insertion, which can be a common issue with other cables. Aluminum tips, braided sleeving, and reinforced rubber bonds contribute to its enhanced durability and longer lifespan.
