Description

3iX TickRemover Loop

The Original Tick Remover. A new, reliable, and effective method for removing ticks safely. The noose system prevents crushing the insect, which eliminates the risk of the tick vomiting into the wound—a common risk when using salt, oil, or fingers. This method ensures that the entire tick, including the head, is removed quickly and safely, even for the smallest ticks.

Once removed, the tick hangs in the noose and can easily be disposed of. Suitable for use on both humans and animals, this tool is an essential companion for all outdoor activities, whether for leisure or professional purposes. It weighs only 6 g and measures approximately 11.5 cm in length.

Product Features:

- **Effortless Removal:** Allows for the safe and complete removal of ticks, without crushing them.
- **Safe for Humans and Animals:** Can be used by both medical professionals and non-professionals.
- **Prevents Pathogen Transmission:** Prevents the tick from transmitting harmful pathogens into the bloodstream.
- **Lightweight and Compact:** Weighs only 6 g, making it easy to carry during outdoor activities.
- **ISO 9002 Certified:** Developed and manufactured in Sweden to the
