Bag / backpack for long range rifle.

Description

Berghaus SMPS Drag Bag Long III Weapon Backpack, 135 cm

The **Berghaus SMPS Drag Bag Long III** is a specially designed weapon backpack, tailored to fit long-distance rifles. Its 135 cm length accommodates rifles up to 130 cm, including mounted scopes and additional accessories. The bag is part of the **SMPS (Special Mission Pack System)** family, ensuring flexibility, durability, and functionality for tactical and military missions. When not in use as a standalone, it fits neatly in the envelope from the Crusader RC, offering more versatility in the field.

Key Features:

- **Fits Long-Distance Rifles:** The bag is capable of holding a 130 cm long rifle, complete with a mounted telescope and various accessories. For larger rifles, components can be stowed in separate parts and secured to the MOLLE attachment loops inside.
- **Removable Harness & Waistbelt:** For maximum comfort and flexibility, the harness and waistbelt can be detached when not needed.
- **Reinforced Back Panel:** The back panel is strengthened with a nylon plate to prevent metal objects from pressing through, providing additional protection for both the user and the weapon.
- **MOLLE Attachment System:** Internal MOLLE loops provide secure storage for larger weapon systems or their components.
