Description

Turn fire into electricity with BioLite's award-winning stove. Patented combustion technology creates a vortex of smokeless flames for a portable campfire that can cook your meals and charge your gear, all at the same time. Leave the gas canisters behind and unlock the potential of the sticks and twigs around you.

Turn fire into electricity.

Like what a solar panel does with the sun, CampStove does with fire. Using an internal thermoelectric generator, the stove converts **heat** into usable **electricity** and uses it to power an **internal fan** for hyper-efficient combustion. Surplus juice is stored in the internal battery so you can access energy when you need it.

- Award-winning patented airflow combustion tech
- Internal 3200 mAh battery stores your energy
- Power lights, GPS watches, and more

Battery	3,200 mAh
USB Output	3 watts
In The Box	CampStove 2+
	FlexLight
