Description

BULLTEC trigger lock – for the safe storage and transport of your weapon – stable and reliable!

The BULLTEC trigger lock consists of two parts, which can be taken apart by swiveling the upper part with the number combination. Both parts are then inserted from left and right onto the trigger guard, the combination lock is pivoted back and the combination is adjusted. Now the trigger of your weapon is protected against unauthorized access.

The lock has a **solid locking bolt** and in addition **6 flexible steel pins**, which adapt to the contour of the trigger guard. Thus, the weapon lock can be used for all common long and short weapons.

The 3-digit number combination is freely selectable. A detailed description is enclosed with each BULLTEC trigger lock.
