### Description

B-COVER™ Gear Sling is a practical and ultralight mini-hook for your gear and at the same time a rain cover for your backpack.

Traveling with a B-COVER™ protected backpack, you can be sure that it will stay dry and clean and that the straps and buckles will not get caught on protruding branches. When camping, the B-COVER™ Gear Sling hangs under a hammock and turns into a convenient “rack” for your gear. It will accommodate and protect not only your backpack but also additional shoes, books, and food.

### Backpack cover

The use of drawcords ensures that the equipment will perform in low temperatures, even when the rubber used in traditional backpack covers breaks. B-COVER™ provides effective protection from snow.

### Gear sling

When preparing a campsite, it is most convenient to first lay the B-COVER™ Gear Sling covered backpack in the hammock. Then, take the suspension system out of the pockets in the corners of the cover and clip them into the hammock's carabiners. Now all you need to do is to put the backpack under the hammock and adjust the suspension height if necessary. The bag which is used for storing the B-COVER™ Gear Sling works perfectly as an additional pocket e.g. drinks. It can be clipped into the edge of a hammock, gear sling, or, for example, suspended from a ridgeline.
