BushBed™ hammock - it's a big, comfortable and light hammock with a mosquito net. "One pull & click" - an easy-operated mosquito set up system, handy pocket just above the head (to keep a headlamp, phone or other valuable things) and low weight place it among the best travel hammocks.

Description

The BUSHBED™ hammock is a large, comfortable, and lightweight travel hammock with a unique mosquito net that protects against insects and morning sunlight. BUSHBED™ is perfect for traveling through bushy areas or forests, at the seaside, or simply in the garden.

When you comfortably lie down, just pull the cord, and the mosquito net will slide out. Then simply click the buckle to close the net. You are fully protected from insects.

Mosquito Net

The mosquito net has a pore diameter of 1 mm, making it excellent for protecting against even the smallest insects, such as flies, black fleas, or young ticks. Its density and the special thread used in the net prevent branches, grass, and other thickets from damaging it. It can be used across the entire hammock area or just its length. The top 2/3 of the cover is made from mosquito net, while the rest is hammock material. The top protects from direct sunlight, moisture, dust, and creates a pleasant sense of closeness with nature.

At any time, you can fold down the mosquito net, creating a window between the top net and the hammock.

Pocket

BUSHBED™ is equipped with a handy pocket for all your necessary items. The pocket is located above the head so that the contents (such as a phone, flashlight, glasses) are easily accessible.

BUSHBED™ is packed in a travel bag with a small hole at the bottom. The hammock rope can be passed through this hole so it is never lost. During the day, the mosquito net can be stored in this bag.

Both the hammock and the top part are made from parachute fabric. Thanks to this, they are airy yet durable. The BushBed™ has a load capacity of 200 kg; its size is 2.8m x 1.4m, making it comfortable for even very tall people to sleep in any position.

Two additional carabiners for mounting and a 4m ridge line for hanging the mosquito net are included.

The total weight with the mosquito net is only 0.65 kg, making it one of the lightest hammocks with a net.

BUSHBED Hammock THERMO-Tarp Tarp

BUSHMEN ® THERMO-Tarp ™ is the perfect addition to the hammock.

The advanced tarp protects against extreme weather conditions. The well-constructed, waterproof, breathable fabric with a thermal insulation layer and attachments located at critical points make THERMO-Tarp ™ much more useful than a classic tarp. Thermo-tarp ™ can be used as a hammock, for example:

- Tent roof against rain or snow
- Sun radiation - the thermal insulation layer completely reflects sunlight, making it much cooler under the tarp
- Underquilt - THERMO-Tarp ™ can be used to prevent body heat loss when sleeping in the hammock
- If it's not possible to set up the hammock, it can be used as a tent.

Included are 2 x 3m hanging cords, 2 x ULTRALIGHT carabiners, and a 4m ridge line.

- Total size: 3 x 1.45 m
- Weight: 0.65 kg
- Maximum load: 200 kg
- Diameter: 1 mm
- Color: olive green

Brand country - Poland.
