Description

Hammock Carabiner ULTRALIGHT is one of the lightest - only 21 g, yet most durable carabiners in the world! Durability - 12kN Static loading is about 1200 kg

Well, in fact, we don't know what you will use it for :-). Anyway, we know for sure that our carabiner will really endure a lot. OK, but why? - The clue is in the delicate T-shape cross-section of the carabiner and the highest class aluminum. Of course, last but not least, extremely precise monitoring of the production process. Most of the hammock carabiners that we know about can endure up to 5kN (about 500 kg). Our carabiner can endure this level our carabiners can last even athwart.

The compact dimensions and a silky surface of the ULTRALIGHT Hammock Carabiner make it very handy to use, even if you wear gloves. The classic D shape of the carabiner is used in climbing carabiners. It is well proven that it is the most convenient shape. For this reason, we also use it in our carabiners. Even when it is dark or in the other unfavorable conditions, the carabiner fits perfectly in the hand so it can be easily used.

20 mm slot According to our experience 20mm is absolutely enough to hang the hammock anywhere you want to hang it.

Precisely rounded edges of the ULTRALIGHT Hammock Carabiner are very handy and nice, but first of all, they do not jag the hammock, the cords, and the tapes to which it is plugged in. Compact size and low weight makes it to be
