Description

Three-segment, telescopic, tarp pole enables to set up a camp where there are no trees. Together with the tarp, it provides a great additional shelter in front of a tent, a car, or just singly.

The intuitive telescopic design of this pole makes it very easy to use.

Half a turn and you can adjust its height.

Half a turn-back, lock it and it's ready.

What remains is to set up tensioners and the tarp itself. For this purpose, the top of the mast has appropriate eyelets and a skewer protected by a removable cap.

Additionally, the widened plastic bottom allows it to be placed on any surface.

Thanks to its telescopic structure, it takes up little space, and there is practically no chance that any of the segments will get lost.

Specification

- material: Aluminium
- Length range: 95-230 cm
- Weight: 500 g
- Diameter of each section: 30, 25, 22 mm

Set contains:
