Description

One of the most universal solutions providing protection against cold and wet. The seemingly simple cut conceals a number of clever solutions that increase its thermal insulation properties and extend its functionality.

THERMO blanket consists of a waterproof and "breathable" polyester with a rip-stop weave covered with a silver heat-reflecting layer from the inside and sewn on the fleece. Thanks to the combination of insulation provided by the fleece and the heat-reflecting layer, the thermal insulation properties are about 30% greater than solutions without a layer that reflects heat radiation.

THERMO-blanket has a rectangular shape with dimensions of 2 m x 1.4 m with 8 plastic loops on the corners and longer sides. In the middle of the longer side, there is a comfortable hood, while the shorter sides are equipped with welts. The set includes two tensioners, two mini carabiners, and a transportation bag. This allows you to use among others as:

- **Poncho:** Just put the hood on your head and you are ready and protected from both - rain and cold. THERMO-blanket will lay in on your shoulders naturally. For additional protection against the cold, you can fasten both sides using the mini carabiners, that are included. This is a great solution when you are sitting, for example, at the fire camp, stand in the chats or in the morning you get up to ... go to the site.

ORDER CONFIRMATION

- **Underblanket:** Comfortable, 3 season hammock underblanket. Protects against cold, wind and rain. Thanks to our tensioners it is very easy to use. Simply attach the tensioners/hooks into the loops on the THERMO-blanket corners. Hang it (fleece inside) from the bottom of the hammock and adjust the position with the cords and welts on the short sides.
- **Side pocket:** An additional advantage is a hood. In this case, it works as a convenient pocket for things that we want to remain on hand.
- **Picnic blanket:** Put the waterproof side on the ground, you will have a comfortable and warm blanket where your children can play safely, and you or your dog can break free and take a nap (if the children allow)
- **Bivy-cover / emergency sleeping bag:** An additional top layer for your sleeping bag - it will protect it from the rain and provide additional insulation. Take off one side creating a kind of foot cover in this way and cover yourself with the rest like a blanket. To protect the blanket from sliding down from the slippery sleeping bag - you can put the tensioners under the mattress and attach them to the loops on the edges of the blanket. Thanks to this, regardless of how you don't fidget - the blanket will stay in place. You can, of course, use it simply as a hammock topquilt. Due to the fact that it is quite wide, 2 people can cover it.

Specification:

- 750 g
- Dimensions 2 m x 1.4 m
- after packing 14 cm x 40 cm

Included:

- 2x mini carabiners
- 2x tensioners
- Transport bag

Brand country - Poland. Made in PRC.
