Description

Excellent bivouac solution. It does not matter if the ground is wet or rocky – you need to find just two durable points to attach your hammock.

You can use trees but as well you can use cars, mast of the yacht or a slot in the rock and your new home is ready.

ULTRALIGHT hammock ZEN is the lightest on the market full-size, 3m x 1.45m hammock.

Packed into a tiny (350ml.) bag with a clever construction.

Ultralight micro-ripstop 15D nylon is convenient, breathable and pleasant to the touch, which ensures comfortable rest. It is also very strong.

With its extremely low weight, the hammock can hold loads up to 130kg. The green colour blends into the natural surroundings.

If you are fed up with every unnecessary gram you need to carry with you, ULTRALIGHT hammock ZEN is a real treat for you.

Here is everything, ULTRALIGHT – we made sure that even the puller was ultralight.

It weighs exactly 0.4831 kg

Tensioning system

The set includes two 3mm Dyneema cords with a tensioning system, the so-called Whoopie slings. They allow to easily hang the hammock. It is enough to hook the ear of the tensioning system by passing it through the hammock loop. Then, insert the tightening tension loop into the target mounting location.

Finally, adjust the position of the hammock using the whoopie slings and... conveniently arrange yourself in the hammock.

Accessories

For greater comfort, we added a ridgeline with a mesh pocket. Thank to that

your valuable items will be always with you.

During the journey, you can keep your tensioning system, ridgeline and any other items in your pocket and know that nothing is lost.

If you are in a hurry and you do not have time to pack the hammock into the bag or the hammock is still damp, you can always push it into the mesh pocket. The pocket is almost twice as large as the hammock bag, so it is easier to dry the hammock. Then put the accessories in the bag of the hammock. It will probably not be very elegant, but it is fast and practical.

In the middle, the hammock has a loop on which you can hang the bag (e.g. from tarp). You can keep there some small items such as glasses or others that did not fit into your pocket.

Bag

ULTRALIGHT hammock ZEN is packed into a tiny bag with a clever construction. The cover combines the advantages of a traditional bag and the "BISHOP-BAG" type cover. One hammock loop passes through a specially reinforced hole in the bottom of the bag.

For this reason, the hammock is intuitively easy to unfold - like from a "sleeve". It is also easy to pack - like a traditional bag.

At the bottom of the bag, there is an additional loop, which can be used as a safety measure. It prevents the hammock from getting lost.

Last but not least - having packed the hammock into the bag, its dimensions are 15 x 5.5 cm. That is, the size of a can with a capacity of 350ml.

Additional information

Weight	0.15 kg
Dimensions	15 × 5.5 × 5.5 cm
