Special peg designed for anchoring in loose ground such as sand or snow. Large surface area and deep penetration gives a perfect grip.

1-4 Weeks

Description

SAND & SNOW peg is a solution when the ground is too loose. Without them, camping on the beach or in the snow is quite a challenge. With them it is a pure pleasure. The large surface and deep penetration of the ground guarantee a good anchoring of your tarp and tent. U-shaped profile ensures high bending strength while maintaining a low weight (36g). In extremely loose terrain, you can attach the guy line by one of the 4 holes and bury the peg horizontally so that it is all under snow / sand. This method of anchoring is called "DEADMAN" and is a great solution that you can use when using SAND & SNOW Pegs.

Specification

- length - 23cm
- width - 3,5cm
- cross-section - U
- Weight - 36g
