Description

Hammock VAGABOND is a complete integrated set hammock + mosquito-net + suspension system. 500g - it's a weight of all set!

Hammock VAGABOND is made of micro-ripstop nylon 15D. Loops made of ultra-strong 3mm cord UHMWPE. With the size of 3mx1,45 weighs just 150g.

Mosquito-net ensures full protection against mosquitoes, ticks, clippers, even against black-flies. The mesh diameter is 7mm. It is 196 eyelets by 1cm2! Each hole (hammock slots and entrance) is secured with a cuff so you can no worry about any abomination coming in uninvited. The mosquito net tightly covers the sides of the hammock, creating effective protection against mosquito nets. The top of the mosquito net is hanged on an attached ridgeline stretched between the carabiners of the hammock. The nylon hem of the cuff prevents clinging to rubbish and significantly increases the durability of the mosquito net.

Both entering and exiting the hammock is very simple. Release the cuff and lift the mosquito net up. The shape of the net has been designed to save every unnecessary gram of equipment.

The suspension system consists of two straps with sewn-in loops for adjusting the hammock tension (tree huggers) and two ultralight carabiners. The system is light, intuitive, and protects trees. Two-meter stripes allow you to select trees within 5m of each other (assuming a tree diameter of about 30 cm). The final adjustment of the hammock tension is done simply by plugging the hammock carabiners into one of the five loops on each of the straps.
