Description

The ball-bearing blade made of satin CPM-S-35VN works its way through everyday cutting work with stoic calm and always finds its way back to its center with the help of the reliable liner lock mechanism. The decorative blade axle screw is the optical starting point of the gentleman's folder as a symbol of the change in form and function and ends in the straight lanyard hole at the end of the handle. The stylish handle made of modern carbon fiber is comfortable to hold and has a practical clip (tip-up/r). With high-quality nylon case for storage.
