Warnings & Safety Information

- **Cut hazard:** Blades are sharp and can cause serious cuts. Always cut away from your body and keep fingers clear of the edge.
- **Risk of slipping:** Excessive force or poor technique can cause the knife to slip. Maintain stable grip and controlled cutting.
- **Drop hazard:** Do not leave knives unsecured near edges or where they

can fall and injure someone.

- **Dull blades are dangerous:** A dull knife requires more force and can slip more easily. Sharpen regularly using proper tools.
- **Use as intended:** Do not use the knife as a pry bar, screwdriver, or lever tool. Misuse can damage the blade and cause injury.

Frequently Asked Questions

Yes, the Böker Plus is a Sanjefine blade capable of doing everyday cutting tasks, with a secure liner lock, pocket clip (right, tip-up) and a nylon pouch.

What kind of premium steel is it? It's a VG-10 steel known for a strong balance of edge retention, corrosion resistance and ease of sharpening, making it popular for EDC and kitchen knives alike.

Does the flipper stick out when the knife is open? In the open position, the flipper tab disappears fully between the stainless steel liners.

What is the handle made of? The handle is made of a composite of fabric layers and resin. It offers good grip, toughness and a warm, textured look that suits gentleman-style knives.

Glossary

- **Flipper** - a protruding tab used to open the blade quickly, often paired with ball bearings.
- **Liner lock** - a locking mechanism where a spring liner moves under the blade tang to hold it open.
- **Micarta** - a layered composite (fabric + resin) valued for grip and durability.
- **Tanto** - a blade shape with an angular tip geometry, often strong and precise for controlled cutting.
