Description

The Camillus Highlimb saw allows you to clear high branches from the safety of the ground. Unlike other branch saws, our patent-pending handle design incorporates weights, allowing you to sling the rope over high branches with ease and precision. The chain saw blade also boasts a dual-direction design, allowing you to cut in both pulling motions for maximum efficiency. For added security, two 20-ft sections of 300lb paracord provide durable and strong connections to safely handle the toughest jobs. A storage pouch with a belt loop is also included to store the saw when not use.

There are numerous applications of the Highlimb saw, some of which include setting up a treestand, clearing shooting lanes before hunting season, storm cleanup, or simply maintaining your property. Truly embodying our signature degree of versatility, the Highlimb saw will make for an integral addition to your tool kit.

Features:

- 20" Saw Blade
- Dual Direction Chainsaw Blade
- 3/8 Pitch Tooth
- 40' of Cordage (20' per side)
- Weighted Handle
