R-Value	11 (ASTM F3340 tested)
Thickness	10 cm
Dimensions (unfolded)	189 × 63 × 10 cm
Packed Size	28 × 14 cm
Weight	900 g (without stuff sack)
Shell Material	20D ripstop nylon
Insulation	3-layer aluminium foil
Valve	Dual-layer TPU

FAQ

What does an R-value of 11 mean? Resistance to heat loss. An R-value of 11 is exceptionally high and means the mat is designed to significantly reduce heat transfer to cold ground, including snow and frozen surfaces.

Is this mat suitable for winter and snow camping? Insulation place it firmly in the four-season category when used as part of an appropriate sleep system.

ORDER CONFIRMATION

How comfortable is it compared to standard mats? superior cushioning and weight distribution compared to thinner inflatable or foam mats.

Is it suitable for backpacking? Packed size, it offers an excellent balance of warmth, comfort, and portability for year-round backpacking.

Is it as noisy like some foil insulated mats? significantly less noticeable than many foil-insulated sleeping mats.

Can it be used when sitting? designed primarily for lying down.

Compression when sitting is normal; over-inflation is not recommended.

Is there a maximum user weight? stated. It is designed and tested for normal adult use when used as intended.

Glossary

- **R-value:** A measure of thermal resistance; higher values indicate better insulation
- **ASTM F3340:** International standard for measuring sleeping mat thermal resistance
- **Air-cell baffles:** Internal chambers that distribute pressure evenly for comfort
- **Ripstop nylon:** Lightweight fabric reinforced to resist tearing
