## Description

The RF-650, LiteWave™ is a 650 yard Laser Rangefinder with a 6x Power Magnification which is a Great Rangefinder for Hunting, Golf, Construction, Archery, Racing, Engineering Surveys, and More. The rangefinder emits a laser beam that is invisible and safe to the eyes. The LiteWave™ then calculates distances by measuring the time it takes for the laser to travel from the rangefinder to the target and then back again. The LiteWave™ rangefinder operates in three different modes. Mode 1 measures straight line distance and degree of elevation. Mode 2 measures straight line (actual) distance, degree of elevation, horizontal distance, and the vertical distance between the horizontal and actual distances. Mode 3 displays all the measurements from Mode 2, however, in this mode the item will continuously scan these distances as you move the reticle around and view different subjects.

The LiteWave™ rangefinder is accurate to within +/- 1 yard in most cases. The effective operating range is from a minimum of 5 yards to a maximum range of 650 yards (3.5 meters to 600 meters). The LiteWave™ rangefinder features a tripod mount located on the bottom of the unit to easily attach the item to any standard tripod for more stable use. It also comes with a carry case and strap.

Takes a CR2 3V Lithium battery (included).

Model Name	LiteWave
Model Number	RF-650
Magnification	6x
Objective Lens Diameter	24mm
