Description

Chiruca Urales Winter Hunting Boots

The **Chiruca Urales Winter Hunting Boots** are crafted from high-quality nubuck leather with a waterproof Gore-Tex membrane, making them ideal for winter hunting. These medium-height leather boots offer excellent protection against water, while the Gore-Tex membrane ensures superior breathability. The natural nubuck leather is hypoallergenic and allows moisture to escape thanks to its preserved pore structure.

Key Features:

- **Gore-Tex Membrane:** Waterproof and highly breathable, providing excellent protection against moisture while maintaining comfort.
- **Natural Nubuck Leather:** Treated with Scotchgard, the nubuck leather is water-resistant and offers superior breathability.
- **Vibram Sole:** Made from natural rubber, the Vibram sole is highly resistant to wear, providing excellent grip and stability on uneven surfaces, and protecting against heat loss.
- **Dual-Density Midsole:** The midsole consists of two layers with varying densities, enhancing comfort and moisture management.
- **Reinforced Heel and Ankle:** Additional reinforcements provide durability and stability, reducing the risk of ankle injuries.
- **Goodyear Construction:** All seams are waterproof and made using the Goodyear method, ensuring longevity and preventing seam failure.
