## Description

Cold Steel's new improved Japanese training swords are closely modeled after the famous *Warrior Series* swords. Featuring an intricately detailed imitation cord wrap grip - molded in high impact polypropylene - they offer superior grip and comfort as well as more realistic training potential for the modern Martial Artist.

The best of the world's martial artists have known a simple truth for ages: If you want to become reasonably good at wielding a fighting implement, you should endeavor to learn the best fighting techniques, footwork, and the basic stances. However, if you want to be a master at it, you will have to eventually start training with "live weapon".

If, for example, your ultimate goal is to wield a razor-sharp sword safely and effectively, you need to train with a sword that approximates the size, feel and heft of a live blade, yet minimizes the possibility of causing grievous, permanent, or life-threatening injury to yourself or your training partner.

This concept was implemented by the ancient Romans, who used dull wooden

swords to train their gladiators and soldiers, and Japanese Samurai used a wooden training sword called a *bokken*. A bokken was made from the super tough wood of the Japanese White Oak, a wood they called *Kashi*. This type of wooden sword is an elegant solution to a vexing problem and effective enough to still be used today, but authentic *Kashi* wood Bokkens are becoming quite costly. The problem is also that a wooden training weapon may rot, crack, split or splinter and eventually become useless.

Cold Steel's solution to these dilemmas was to design a line of synthetic substitutes that are low in price and impervious to the elements. The Cold Steel line of training weapons are made of the heaviest grade polypropylene available and closely duplicate their real counterparts in length, size and feel. While they are not quite as rigid as wood, they have the winning advantages of being virtually unbreakable, remarkably stiff and cut resistant.

### Details:

- Wakizashi Bokken with imitation cord wrap grip
- Overall length: approx. 69.5 cm
- Blade length: approx. 53.3 cm
- Blade thickness: approx. 1.9 cm
- Hilt length: approx. 16.2 cm
- Material: Polypropylene
- Weight: approx. 346 g
- Cold Steel Product No.: 92BKKB
