Description

Comodo Performance light hiking socks are specialized socks designed for any activity involving long walking, such as mountain hikes, forest hikes, long walks, etc. Designed for tourism and everyday use on cold days. The socks are designed to meet the expectations of the most demanding users. High quality socks guarantee wearing comfort. Australian merino wool of the highest quality provides ideal thermal insulation, protecting the feet not only from cold, but also from overheating. Socks have the ability to maintain temperature and wick away moisture. The addition of 38% acrylic improves the strength properties of the fiber. Socks have thermal properties - they maintain ideal temperature conditions and also keep your feet dry, preventing unpleasant odors. The socks are suitable for both women and men.

Main advantages:

- Protective terry zone.
- Protects ankles from chafing.
- Reinforced terry zone.
- Protects against calluses and corns.
- Increases air circulation.
- Reduces friction and pressure.
- Provides protection against impacts.
- Reduces blood pressure.
- Flat seams.

Material composition:

- 38% merino wool
- 38% acrylic
- 15% polyamide
- 4% polypropylene
- 5% elasthan

Made in Poland.

Materials and technologies:

Merino wool is the highest quality natural wool produced from Merino sheep. Merino wool yarn is exceptionally soft, providing a high level of comfort. Merino wool provides excellent thermal insulation: it cools the skin in hot summers and warms it in cold winters. This happens due to the fact that air is retained in the structure of the wool fiber. Regardless of the type of physical activity undertaken, wool insulates and regulates temperature. It allows you to keep warm during frost and cool during hot weather, and also removes moisture, leaving the skin dry for a long time.
