military applications.

Beyond medical devices, CVN Medical Solutions also provides certified **TCCC** and **TECC** training programs. The company operates under strict quality standards including **ISO 9001**, **ISO 14001**, **ISO 13485** and **AQAP**, ensuring high reliability and compliance.

FAQ

What is the purpose of the pressure bar? Compression directly to the wound, improving bleeding control.

Is the bandage sterile? Yes, it is sterile and ready for immediate use.

Can it be used in tactical environments? Yes, it is suitable for use in tactical environments, including military and emergency response applications.

Does it contain metal parts? No, it is metal-free.

Glossary

- **Compression bandage:** A bandage designed to apply pressure to control bleeding.
- **Pressure bar:** A component used to increase pressure on a wound.
- **Non-adherent pad:** A dressing that does not stick to the wound.
- **Gamma sterilised:** Sterilisation method using radiation to eliminate microorganisms.

Safety Information

Use only for intended medical purposes. Proper training in first aid or trauma care is recommended.
