Description

CVN Hexagon Chest Seal, Vented, Twin Pack

The CVN Hexagon Chest Seal is designed for the treatment of open chest wounds, providing rapid and effective coverage. Its strongly adhering hydrogel adhesive ensures a secure fit, adapting perfectly to the skin's surface. The Hexagon shape offers a wider coverage area for better wound protection, while the vented design allows air to escape, reducing the risk of tension pneumothorax. The package includes two Chest Seals, each individually packed, allowing you to use one seal at a time if needed.

Key Features:

- **Hexagon Shape:** Provides a wide coverage area for effective sealing of chest wounds.
- **Hydrogel Adhesive:** The strong, self-adhesive hydrogel ensures the seal adapts perfectly to the skin, providing a reliable hold even in challenging conditions.
- **Easy & Fast Application:** The two-part plastic cover makes it quick

and easy to apply in emergency situations.

- **Compact & Lightweight:** The chest seal is light, durable, and easy to carry, making it ideal for tactical use and first aid kits.
- **Vented Design:** Allows air to escape from the chest cavity while preventing air from entering, reducing the risk of tension pneumothorax.
- **Long Shelf Life:** Designed for long-term storage, making it perfect for emergency preparedness kits.
