Description

The jacket offers maximum protection in adverse weather conditions. In cases of excessively low temperatures it can be used in combination with the INNER JACKET (sold separately).

Constructed with 3 layers of PFT POLYAMIDE with external treatment in PTFE, a water-repellent, windproof and breathable material, it has a semi-rigid manufacturing with seams sealed by HS tape and internally it is lined with mesh mesh.

On the front it has a double-direction zipper with a TOP-OP emergency quick release that allows quick opening even when the zipper is completely closed, and an external anti-water and windproof flap.

Internal rear longitudinal pocket, internal elastic band, underarm zipped openings for ventilation, adjustable cuffs, pocket on left and right arm, two internal chest pockets and two external waist pockets with anti-water flap and two protective caps: one fixed for the head protection and a removable one, with visor and adjustment for use over the helmet or helmet. Both hoods are foldable and stored in the collar of the jacket. Velcro for shield on right and left arm and front insert for tubular grade.
