Rod Material	Carbon steel + hard chrome
	(C140C3X1, 4%)
Hardness	HRC 62-64
Handle	Ergonomic black PP (polypropylene)
Rod Length	230 mm / 9.06"
Overall Length	360 mm / 14.17"
Made in	European Union

Other Useful Information

Diamond rod sharpeners are often misunderstood. Their primary role is not to grind new edges but to realign and maintain the knife's existing sharpness. The chrome coating improves durability and resistance to corrosion, while the HRC 62-64 hardness ensures the rod is harder than most knife steels, allowing it to effectively hone blades.

Glossary

• Honing vs. Sharpening: Honing realigns the existing edge, while

sharpening removes material to create a new edge.

- HRC (Hardness Rockwell C): A scale used to measure the hardness of steels. HRC 62-64 indicates very high hardness suitable for professional honing tools.
- Hard Chrome Coating: A surface treatment that provides durability, wear resistance, and corrosion protection.
