Description

Dutralion DutralionGel – Air Purification & Odor Control

Description:

DutralionGel is an air purification and odor control solution that contains chlorine dioxide, a compound known for its disinfection properties. The gel effectively eliminates odors, disinfects, and freshens indoor air. When mixed with water, the powder transforms into a gel that gradually releases chlorine dioxide into the air, providing dry disinfection of up to 40 m³ with a 30-gram packet and up to 250 m³ with a 180-gram packet. The treatment's effect can last up to one month, depending on the environmental conditions.

Key Features:

- Chlorine dioxide-based air purification and odor control.
- Effective against bacteria, mold, and fungi.
- Extends the storage time of food products in enclosed spaces.
- Long shelf life of up to 3 years when stored in a sealed package.
- Easy to use in various environments, including warehouses, homes, and industrial facilities.

ORDER CONFIRMATION

Benefits:

- Prevents bacterial growth and decay.
- Protects against mold spores and fungi.
- Safe for human and animal health.
- Environmentally friendly.
- Convenient packaging for transportation and storage.

Available Sizes:

- **30 grams:** Treats up to 40 m³ of space.
- **180 grams:** Treats up to 250 m³ of space.
- **120 ml:** Available in gel form in a jar for convenience.

Usage Instructions:

For the 30g Package

- Step 1 - Container Preparation:**
 - Add 100-120 ml of water into a clean container of corresponding size:
 - For 4-6 cm container diameter, use 100-110 ml of water.Use openable water container diameter 10-12 cm at 20-25°C of water.
- Step 2 - Adding 30 grams DutriGel Powder:** Open the package of DutriGel and gently pour all powder into the water. Avoid spillage and dust inhalation.
- Step 3 - Reaction Time:** Do not shake or stir the mixture. A yellowish gel will form. Wait for 24 hours to complete the reaction process, depending on water temperature.
- Step 4 - Release Period:** Once formed, the chlorine dioxide will gradually be released, providing long-lasting air purification. Adjust the container cap to fine-tune the venting capacity.

For the 180g Package

- Step 1 - Container Preparation:**
 - Add 500-720 ml of water into a clean container of corresponding size:
 - For 10-12 cm container diameter, use 500-600 ml of water.Use openable water container diameter 10-12 cm at 20-25°C of water.
- Step 2 - Adding 180 grams DutriGel Powder:** Open the package of DutriGel and gently pour all powder into the water. Avoid spillage and dust inhalation.
- Step 3 - Reaction Time:** Do not shake or stir the mixture. A yellowish gel will form. Wait for 24 hours to complete the reaction process, depending on water temperature.
- Step 4 - Release Period:** Once formed, the chlorine dioxide will gradually be released, providing long-lasting air purification.
