Description

The Earmor M32X MK3 Active Hearing Protectors feature two directional microphones so you can freely listen to ambient sounds. The ear protectors effectively reduce harmful sounds and attenuate them to 85 dB.

The MK3 shooting protectors have been improved to meet the demanding military standards, MIL-STD-416 and MIL-STD-810G. The volume control has 5 levels. The headphones are sold with a 3.5 mm AUX input cable, and a protective pouch.

In addition to the standard clamp, the ear protectors feature an M16 mount designed to attach to the ARC rails of tactical helmets and helmets. The 360° swivel design makes it easy to use the headphones with the helmet. The headset is equipped with an additional headband with a microphone, which can be mounted on the right or left side, it also has a cable with a Nexus TP-120 U-174 plug (NATO standard), which allows to connect the headset of the headphones with a radio.

Features:

- Allow you to hear normally and even amplify standard sounds: speech, commands, instructions, environmental sounds
- Protect hearing when shot (or other noise)
- Enhance standard sounds
- Low-profile bowls make it easier to operate the weapon
- 5 volume levels
- Designed and complies with MIL-STD-416 standard for EMI / RFI
