Description

This battle-proven pack is the favorite model chosen worldwide by many of the most elite special operations sniper teams and others who carry multiple weapons for a long distance.

The Operator Pack offers lots of space for your gear and features like the double-walled sidewalls which allow you to pack and transport your gear as needed.

INTEX frame system

This frame combines the best characteristics of traditional external frames with the comfort of an internal frame at minimal weight. The INTEX frame is easily removed and interchangeable with the lighter and more compact Gossamer frame (AG2L, sold separately).

Weapon transport

If you are not carrying your weapon, the scabbard folds into the bottom of the pack. The G4 comes with the GSTC Butt Cover which fully covers a long gun of up to 55".

Tactical design

The side pockets peel back and can be used as support when shooting from your pack.

Pull-out rain cover

A pull-out rain cover keeps your backpack dry in nasty conditions.
