Description

Advanced Gear Platform

The **Guardian Recce Chest Rig** is an enhanced platform designed for reconnaissance operations and green tactics. It accommodates four AK/AR magazines in pouches secured with buckles. Additionally, the chest rig features a large administrative pocket on the front, lined with a soft hook & loop, allowing for customization using inserts from the **VIS (Versatile Insert System)**. This pocket also has an adjustable opening to prevent contents from falling out.

On either side of the administrative pocket are two universal buckle-closed pockets, suitable for fragmentation or smoke grenades. These pockets can also accommodate two pistol magazines when equipped with inserts from the **Competition series**. Along the sides of the chest rig, MOLLE/PALS-compatible webbing allows for the attachment of additional pouches.

Inside the chest rig is a large, zippered pocket, perfect for carrying maps, notebooks, etc. On the body side, the chest rig has two flat pockets
