Description

A new contemporary design meets tried and tested practicality. The result? A food jug that's at home in the city as it is outdoors.

This food jug really does turn every head. It looks very good - and thanks to the high-quality powder coating, it's also easy to hold.

Its practicality is convincing too: with its reliable insulating technology, the food jug keeps food hot or cold for particularly long periods of time. It can be opened easily at any time thanks to its pressure release button, and the lid can also be used practically as a bowl. The large opening of the food jug, which holds around 800 ml, is not only practical when adding food or eating it, it also makes it easy to clean afterwards.

FJ800TL-DG at a glance:

- Sturdy food jug
- In high-quality 18/8 stainless steel
- Keeps food hot or cold for a particularly long time
- 100% leak-proof
- Closure with pressure release button
- Large opening for easy filling, eating and cleaning
- Lid can be used as a bowl
- High-quality powder coating
- Non-slip protection pad for good stability and protection of container and standing surface
