## Description

- Robust SCULPTOR vacuum flask
- Made of double-walled 18/8 stainless steel
- Keeps drinks hot or cold for a particularly long time
- High-quality powder coating
- 100 % leak-proof twist and pour closure
- Lid serves as a cup
- Second drinking cup included for 1000 ml size
- Free from BPA and phthalates

Whether in the city or out in nature - with the SCULPTOR vacuum flask, your drinks stay hot or cold when you're out and about. The vacuum flask is made of double-walled 18/8 stainless steel and therefore has reliable insulating properties. A high-quality powder coating gives the bottle a slightly matt, non-slip surface.

The SCULPTOR vacuum flask is practical when you are travelling with company. You can use the lid as a drinking cup. The 750 and 1000 ml sizes also have a second drinking cup under the lid for easy sharing. The closure is a screw and pouring closure. This means you don't have to twist the cap off completely to pour. So less heat can escape on the go. The closure is also 100 % leak-proof.

A special version of the SCULPTOR vacuum flask is the black 1000 ml sleeve
