Description

Tre Kronor, the Swedish knife series, offers a highly advanced technological solution combined with timeless Swedish design. As the result of a long development process, we are the first company in the world to be able to offer a laminated knife blade in 3G steel, edged with sintered steel, or powder steel. To this edge steel, we have added a resilient, anticorrosive steel which stabilizes the hard centre. This gives a rigid, strong blade that retains its edge extremely well.

If price and performance are the deciding factors, then TK2 is the hands-down winner. The secure, comfortable grip and the powerful blade in laminated powder steel form a combination whose value is unparalleled in the world. It is a utility knife which one can rely on and which will perform for you through thick and thin. The knives are delivered in our ordinary white box.

- Steel: 3G
- Hardness (HRC): 62
- Edge: Convex
