### Description

More than half the world's population is female - and yet model WM is probably the first sheath knife designed from scratch to suit the hands and requirements of WoMen. The non-aggressive blade design, the safe well-tailored handle, the robust leather sheath - everything breathes functionality. The clean lines are not an objective in themselves; it is rather the function that has governed the design of what has become a complete sheath-knife for everyday usage. The improved convex ground blade provides a blade profile which cuts with ease, while giving a sharp edge suitable for whittling. The comfortable, ergonomically designed handle gives a good, secure grip even in wet or cold hands and enables full control of the edge positioning. The knife is also hygienic, as it is easy to clean. The very sharp blade runs through the handle at almost full width and, as we use a hi-end special steel, we are confident that this knife is among the best for small game hunting. The well balanced Lam. CoS special steel is put through an extensive and advanced tempering process, partly to achieve high strength, partly for added edge retention, qualities that make our knives much sought-after.

The knife is equipped with a well sewn leather sheath.
