Description

The Fenix LR50R 12000 lumen flashlight is the definition of a high-performance spotlight. Blasting a maximum 12000 lumens, this flashlight can throw that light an incredible 3117ft (950m)—that's over half of a mile. The Fenix LR50R's most unique feature is its intelligent downshifting sensor which recognizes when the flashlight's head is too close to an object and will automatically downshift the brightness level to avoid accidents due to excessive heat. The included li-ion battery pack not only powers its eight lighting modes, but you can also use its discharge function to charge other devices. Perfect for situations where maximum brightness over long distances is a must, the Fenix LR50R Rechargeable Flashlight will light up the night.

Additional Features of the Fenix LR50R 12,000 Lumen Flashlight

- 4 Luminus SST70 LEDs with a lifespan of 50,000 hours
- Intelligent brightness downshifting sensor to avoid dangers due to high temperature
- Instant turbo activation rapidly responds to emergency situations
- USB Type-C charging and discharging interface, supports PD3.0/PD2.0, QC3.0/QC2.0 fast charging protocols
- Battery level indicator for instant checking of remaining battery levels
