Description

Nasopharyngeal Airway is a high-quality tubular device designed to help keep patients' airways open for improved oxygenation and ventilation. Nasopharyngeal Airway features a fixed flange end to limit the depth of insertion and internal striations to allow for smoother passage of suction catheters.

- Designed to be inserted into the nasal passage
- Fixed flange design limits the depth of insertion for safe, secure placement
- Constructed from soft materials for enhanced comfort
- Features rounded tip for gentle insertion
- Strong, flexible tubing resists collapse and kinking
- Not made from natural rubber latex
- Size - 28FR , 7 mm
