Description

Reusable, washable mouth and nose mask made of 100 % cotton. Equipped with a breathing valve, filter compartment for PM 2.5 filters (two filters included) and adjustable ear bands. This allows the mask to be customized according to your needs.

When you use regular mask condensate starts to develop behind it. That makes breathing very uncomfortable and unhealthy in low temperatures, which can lead to some health issues. Breathing valve opens on exhale thus letting condensate out.

Properties:

- Washable
- Adjustable ear bands
- With breathing valve
- Dimensions L 22 W 18 cm
- Weight 25 g
- 100 % Cotton
- Washable at 40 ° C

Filter PM 2.5 can be used up to 60 h in common environment and up to 20 h in heavily polluted environment. Replace filters when they are soiled and contaminated.

ORDER CONFIRMATION

Reminder: For your health, please wash your hands and wear them to avoid dust and virus infection on the inner layer of the mask.

After using the mask, please store it in a clean and dry place as far as possible to avoid folding, so as not to damage the bridge of the nose.

Suggested cleaning method: Remove the PM2.5 filter before cleaning, dilute it with neutral detergent and water, put the mask in, and brush it flat.

Just dry it in a cool place. Do not put it in the washing machine with other clothes. It is generally recommended to wash once every 1-2 weeks.

The filter is replaced during cleaning.

PM2.5 filters are an important part of this product. Do not use filters from other sources that are not approved by the producer. The company is not responsible for any adverse reactions caused by this.

Made in PRC.
