## FAQ

---

### ORDER CONFIRMATION

---

Can the Servator be used with gloves?

Yes. The Forprene® handle texture and generous guard are designed for secure control with wet or gloved hands.

What are the two holes near the blade for?

They are **tether/lashing holes** to secure the knife to a cord or to *improvise lashing to a pole* when circumstances require extended reach.

Is the coating reflective?

No. Black Idroglider® reduces reflections and adds corrosion resistance, aiding low-visibility operations.

Does the sheath support MOLLE?

The Kydex® sheath includes multi-slot mounting; with appropriate adapters it can be fitted to MOLLE platforms.

## Glossary

- **N690Co**: Cobalt-alloyed stainless steel known for toughness and corrosion resistance.
- **Idroglider®**: PTFE-based protective finish that minimizes glare and friction.
- **Forprene®**: Oil- and weather-resistant elastomer offering secure grip in harsh conditions.
- **Kydex®**: Thermoformed sheath material with high retention and impact resistance.
