Description

Take care of optimal conditions in your surroundings. The intelligent sensor Gosund S6 accurately measures temperature and air humidity – measurement results can be found on the backlit LCD screen or in the application. The product allows you to choose the unit (°C or °F) and works with other devices, enabling automation. It is also compatible with voice assistants Google Assistant and Amazon Alexa.

The S6 sensor allows you to choose the temperature measurement unit – available options are °C and °F. After changing the settings, the device will synchronize the data displayed on the screen and in the application. You can also choose the time display format (12-hour or 24-hour).

Enjoy greater comfort in your home. Using the application, you can connect the sensor to other devices to automate their operation. This way, for example, when the humidity in the environment drops below a certain level, the air humidifier will automatically start.

The sensor is compatible with smart assistants such as Amazon Alexa and Google Assistant. So, you can control it with your voice! Now, just a few words are enough to find out the temperature or humidity in a selected room.

ORDER CONFIRMATION

This practical sensor will work perfectly in different rooms. You can use it in the bedroom, child's room, or greenhouse. If you want, hang it on the wall or simply place it on a table or shelf. With it, you can keep track of and be sure that optimal conditions prevail in your chosen environment. The dedicated Gosund app allows you to view historical data on temperature and humidity. You can also store them for a year and export them to your email address. However, that's not all the possibilities. The app also offers an alarm function – when the temperature or humidity exceeds the set level, you will receive an immediate notification.

Brand Gosund

Model S6

Power Supply 3x AAA batteries

Wi-Fi Standard 2.4 GHz IEEE 802.11 b/g/n

Temperature Measurement Range From -9.9°C to 60°C

Temperature Measurement Accuracy ±1°C

Humidity Measurement Range 0% RH – 99% RH

Humidity Measurement Accuracy ±5% RH

Dimensions 56 x 56 x 23 mm

Made in PRC.
