## Description

The most important addition to the updated editions is the section "Guide to Nature Trails", which includes the best nature trails of each region - Zemgale, Kurzeme, Latgale and Vidzeme, totaling more than 60. Such a compilation has been made for the first time, and it was created together with experts from the portal dodies.lv When making a choice, many considerations are taken into account: the substantive and scenic values of the trails, the location, the quality of the infrastructure, etc. Each trail has a description, a detailed map, pictures and information about the length of the trail, estimated hiking time, road surface, rated difficulty, whether it is marked in nature, whether there are rest and fire places available, whether it can be cycled, baby carriages or wheelchairs, etc. There are also news for cyclists. The editions show cycle routes marked in nature with the official designation (a blue plate with a white bicycle and the number of the cycle route), which have been numbered. These numbers are now given on the maps next to each route, and each edition has a list of the cycle routes included in it. For lovers of water tourism, the distances to the rivers have been clarified, supplemented and newly included. The publications were created in cooperation with the joint-stock company "Latvijas valsts meži", which takes care of the management and beautification of a large part of the nature trails included in the publication. In addition, more than 350 other mammadaba recreation places are maintained throughout Latvia, offering the opportunity to enjoy the beauty of nature and the availability of forests free of charge. The first issue of the four-issue series "With a map in nature" was published two years ago. It was like a logical continuation of the first edition of the Great Latvian Atlas, applying the voluminous atlas for convenient and safe use in nature, even in bad weather and terrain conditions. They are based on a detailed map on a scale of 1:100,000 (1 cm on the map = 1 km in nature) for the entire territory of Latvia, each page

is laminated, so they have become more resistant to moisture and various damages caused by active use, while the spiral binding allows them to be easily turned over and use. Taking into account the growing interest of lovers of active recreation, this year the series has been supplemented and renewed.

The essence of the series editions is to act as a precise tool in off-road conditions (on the road, in the river, in the forest), helping its user to determine the location or plan the future path. The advantage compared to the maps available in navigation equipment, smartphones and computer tablets is their transparency, detail, as well as the ability to use the maps in any conditions and for any length of time, regardless of the device's battery life or internet availability.

Series "With a map in nature"

Updated edition

Dimensions 213 x 300 mm

Zemgale- 54 pages

Laminated pages of each issue

Spiral binding
